To whom may concern:

We had our Air Conditioning system installed when we first open the business, we had issues over the years, Hampton's Air heating and air conditioning came to our store offering their services and a comfort solutions to our air conditioning issues, we had other solutions offers by other companies but we didn't felt the connection or that they cared about our business like Hamptons Air did, they took their time to review, study and design the possibilities of a proper installation, they treated us like people and not another number, explained and educated us that our unit was too small and encouraged us to add a bigger source of air to it.

We are satisfied with the work and effort Hamptons Air Heating and Air Conditioning put to install this equipment, with the performance we saw by them, we realized that not only were they trustworthy but professional and confident about their work and what they can accomplish as a company.

We here at East Quogue Pizza & Deli advise other small businesses or home owners to give them an opportunity because they will not fall short.

Sincerely;

Manuel De La Cruz
